

# Interior Design

University of Applied Sciences Trier

## ABOUT

Interior designers are experts in planning and building internal spaces within an architectural context. Therefore a good design takes consideration of ecological, economical, cultural and social issues. To understand and draft spaces interior designers need to face solutions for upcoming questions about construction, technology and material. Working as an interior designer means a steadily learning process.

The BA course Interior Design at University of Applied Sciences Trier offers interdisciplinary work as well. Links with classes of the courses of architecture, graphic design, jewelry design, intermedia and fashion design are provided.
